

Become an IT legend of the mobility revolution !

Jobs with Smile @  GeoMobile

This is us – Ruhrpott mentality and explorer spirit

As a subsidiary of T-Systems International GmbH with around 30 employees, we offer you lean structures with the advantages of a large corporation. We are active in the areas of hardware and software development and are an innovative player in local public transport. We develop app-based software applications to improve the mobility of our customers.

Over 200,000 people are already using our mobility apps. Our hardware modules bring a large number of vehicles in Germany into the Internet of Things. With us, public transport companies are making urban mobility easier and more convenient.

We are a Dortmund-based company. Many of us grew up in the Ruhr region or studied here. Together, we are continuing the success story of our region: the Ruhr metropolitan region stands for change through technical progress – just like us!

We need you: iOS Developer (m/f/d)

We need you for this:

As an iOS developer, you will be responsible for the new and further development of innovative iOS apps. Your main tasks include:

- Development of new features in the frontend with connection to the backend
- Analysis, design and implementation in the iOS environment based on modern frameworks and technologies
- Agile and test-driven development
- Supporting the sales department with technical questions

This is who you are:

You have several years of professional experience as an iOS developer and have ideally completed an apprenticeship, a degree in computer science or a comparable field.

Your other skills include:

- Very good knowledge of **iOS SDK** and **Swift**
- Good programming skills in **Swift UI**
- Good knowledge of **Xcode** and tools such as Git and Proxyman
- Experience in the integration of Backend systems (**REST APIs, JSON, OpenAPI, etc.**)
- Experience in working with architecture patterns such as MVVM
- Experience in **agile** development (Scrum, Kanban)
- Ideally: Experience with unit testing and UI testing | Reactive programming
- Good written and spoken German and English skills.

What we offer you:

- The opportunity to play an active role in shaping the future of local public transport
- Flexible working hours, home office possible
- Agile, international working environment
- Company pension scheme, capital-forming benefits
- Equipped kitchen incl. Fruit, snacks and drinks
- And of course: an open-minded team with a relaxed atmosphere and spontaneous team events, e.g. at the table tennis or arcade, is looking forward to meeting you!

Applying is easy!

Simply send your application to jobs@geomobile.de

GeoMobile GmbH, Emil-Figge-Str. 80, 44227 Dortmund
Phone: +49 (0) 231 9742 7230

Is this job not the right one for you ?

We are also happy to accept unsolicited applications!
